Date- 20.11.2024

Dy. CEE/W  
Eastern Railway  
Kanchrapara.

**Sub:** Request for List of Traction Motors Fitted with FAG India-make Bearings in Jhajha based MCs.

It is brought to your kind attention about a recent incident involving the failure of a traction motor (TM) in Motor Coach 189159 on 28th October 2024, which occurred at MKA. A joint inspection was conducted at KPA, and the findings concluded that the failure of the TM was due to the failure of a newly installed NU-328 PE bearing, manufactured by FAG India.

In light of this, it is requested that kindly provide a comprehensive list of all traction motors fitted with FAG India make bearings, specifically with details on the motor coaches they are installed in. This information will aid in assessing the potential risk of similar failures and take preventive action to the extent possible at this end.

This is for your kind information and necessary action please.
